

## Aerial Work Platforms

Aerial Work Platforms - There are different forklift accessories offered on the market. They can help transform your lift truck so that you could expand your ability to pick things up or finish clean up jobs and material handling with out difficulty.

A lot of the attachments are specifically designed to be able to fit on the forks themselves. Blade extensions for instance, are used when you require more fork length, that increases lifting capability. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Rounded or triangular attachments are another type used whenever transporting rolled material to be able to make sure it does not roll off of the traditional flat blades.

Examples of lifting accessories comprise pivoting and telescoping boom or crane accessories. They can come in quite a few different kinds and are normally designed for moving lumber, poles, metal bars and different kinds of bulky objects. Other attachments such as different kinds of hooks and hook plates are accessible in order to lift things utilizing a sling or chain. Slab lifters and magnetic filters are other items which could be used along with hook accessories. Slab lifters are specialized attachments which are designed for carrying a variety of materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which attach to your lift truck so as to make transferring rolls of carpet a lot easier. The accessory connects onto the lift truck's forks and has a pole which goes through the center of the carpet roll.

There are many other kinds of forklift attachments which could be designed for facility maintenance like for example snow blades. These blades attach to front end loaders and can transport materials like for instance snow, dirt and soil. Other common cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the lift truck forks hook onto for sweeping big spaces like for instance factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris like on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up quick and easy.

A material spreader is one more lift truck attachment which is normally utilized at facilities. These spreaders are handy for a range of applications like for example spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Work platforms are another optional lifting accessory which many businesses use on a daily basis. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models available which are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location utilizing the lift truck. Larger platform units have extra space for personnel so as to bring tools and other essential stuff intended for the task. Often work platforms are made of poly material or steel.
